

UAS DIESEL POWER[®]

Unit Injector Systems Attachment for the DIESEL TECH Unit

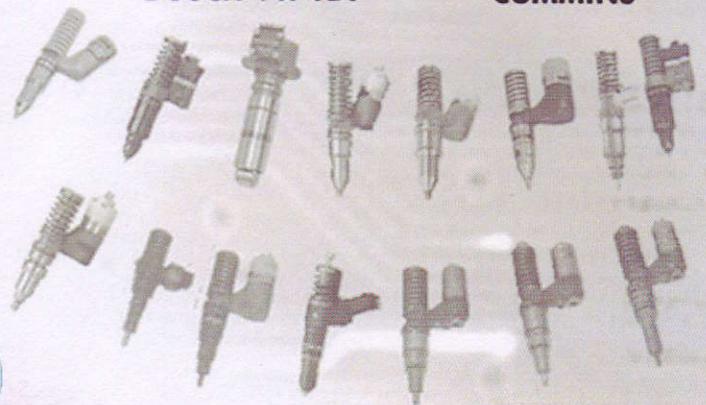

FEATURES

- EUI/ UI Pneumatic Simulation
- EUI/ UI Pop-Testing
- Spray volume measurement
- Fast Mount & Un-Mount Injectors
- Ultrasonic Cleaning
- Injector Chemical cleaning and flushing
- LCD User Friendly Interface
- Fully user programmable test plans
- Upgradable to all types of EUI Injectors
- Low pressure fluid gauge and adjust valve
- STRK (RPM): 30-500
- msec:1-100
- * Unit Pump expandable unit
- * HEUI expandable unit

Applicable to:

- | | |
|--------------|----------------|
| IVECO | DETROIT DIESEL |
| VOLVO | JOHN DEERE* |
| SCANIA | CATERPILLAR |
| BOSCH USA | NAVISTAR* |
| BOSCH VW TDI | CUMMINS |

*Future Upgrades

UAS

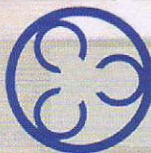

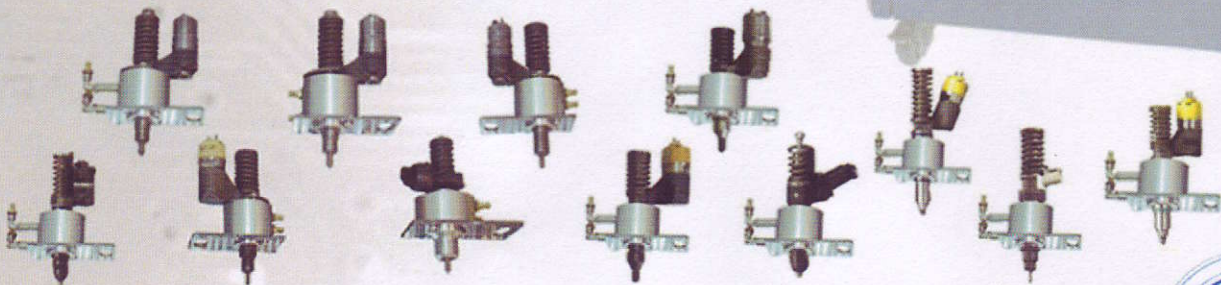

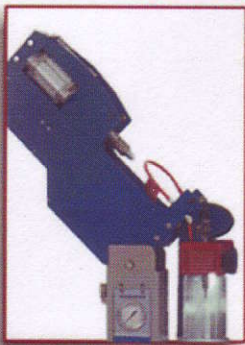

Control Panel

- Intelligent Software simulates cam for realistic results.
- Automatic or user defined cam timing and duration
- Simulation programs for many injectors and programming capability.
- Step-by-step operating instructions on LCD
- Capability to change the Volt- Amp triggering signal
- Injector resistance test (Ohm)

Mounting Device

- Easy Attachment to the Diesel tech unit.
- Easily and quickly mount any UI/ EUI/UP injector.
- Adapters provided for different types of injectors.
- Fully adjustable mounting device to all injectors sizes.
- Mounting device tilts at 80 degrees in order to operate the DT machine standalone.
